DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Pre-Brief, filed 11/30/06, with respect to claims 1-3, 7-8 and 10-13 have been fully considered and are persuasive.

Allowable Subject Matter

2. Claims 1-20 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Prior art fails to show, a drive element, a frame which rotatably supports the drive element, a contacted element which is stationary with respect to the frame that undergoes extension and contraction which includes a piezoelectric element and the vibration element being fixedly mounted on the driven element. Wherein, the vibrating element receives reaction force from the contacted element in a state where the contact portion abuts on the contacted element and the vibrating element receives reaction force from the contacted element when the vibrating element vibrates so that the driven element is rotated together with the vibrating element by means of reaction force. Prior art fails to show a decelerating mechanism provide between the contacted element and the frame; wherein the vibrating element transmits power to the driven element via the contacted element and the decelerating mechanism to rotate the driven element together with the vibrating element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
